

Title of Tutorial: ***Applications of Microsoft Excel ® in Chemical Engineering***

Speaker: Dr M H Joshipura , Prof. Parag Saxena, Prof. Priya Saxena and Prof. S P Dabke (External)

Content for Tutorial Web Page:

This tutorial is intended to give exposure to the use of Microsoft Excel ® for computational purposes in the field of Chemical Engineering. Excel is very much useful for solving various chemical engineering problems related to process design, simulation and optimisation. The knowledge of such tool can be a very good value addition for aspiring engineers, practising engineers, researchers and academicians. The objective of this programme is to make participants conversant with the use of Excel. To achieve this goal in addition to the theory, laboratory sessions would be organized to give hands-on experience. This tutorial will be conducted by experienced and senior faculty members of Chemical Engineering Department of Institute of Technology, Nirma University as well as external experts.
